Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "the asset" in page 7, last line. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Christensen (2,555,318). Christensen teaches a method for blast protection system for protecting an asset from a blast force, the system comprising: a shaft (78); a plurality of plates/disks/Belleville springs (36) with concave/convex side (col. 5, line 1) mounted on

Art Unit: 3641

the shaft; a panel (51) attached to a first plate (37, top part) of the plurality of plates and for receiving the blast force and transmitting a portion of the blast force to the first plate; and a base (38) attached to a second plate (37, bottom part) of the plurality of the plates and for receiving a portion of the force transmitted to the first plate by the panel; wherein the plurality of plates slides on the shaft when the portion of the force transmitted to the first plate is transmitted to the base (col. 5, lines 22-36) ; and wherein at lest one or majority of the plurality of plates are slidably mounted on the shaft and prestressed against each other before being subjected to the blast force (col. 4, lines 47-54).
